1.2 An extended concept of the personal information space	37
1.2.1 The understanding of the PIS concept adopted in this work.....	38
Part II Methodological Issues	43
2.1 The methodological significance of the PIS	43
2.2 Box-ticking hypothesis	45
2.3 An indicator-based working model.....	47
2.3.1 Status of library accounts.....	48
2.3.2 Contents of bibliographies in publications	49
2.3.3 Indicators of activity in the collection of bibliographic information ..	49
2.3.4 Indicators of activity in accumulating texts of studies and information sources.....	54
2.3.5 Indicators relating to the publishing process	56
2.3.6 Selected indicators of scholarly communication	57
2.3.7 Information-related actions.....	61
2.3.8 Research plan.....	63
2.3.9 Description of research tools	64
Part III Survey Results and Analysis	67
3.1 Frequency and systematic nature of activity.....	67
3.2 Recording of search results.....	71
3.3 Process of bibliographic searching	73
3.4 Collection and archiving of materials (full texts of studies, sources, papers).....	76
3.5 Factors hindering the use of literature.....	79
3.6 Conditions for the publication of work.....	81
3.7 Use of academic libraries.....	83
3.8 Tools used in scholarly communication.....	86
3.9 Estimates concerning scholarly communication.....	88
3.10 Attitudes to digital information infrastructure	91
3.11 Results of Survey 4	94

3.12 Sources of information concerning information tools (results of Survey 2).....	99
3.13 Content of bibliographies in publications – a bibliometric analysis.....	104

Part IV Elements of the PIS – Evaluating the Current State 107

4.1 Information infrastructure.....	107
4.1.1 The form of information infrastructure in the humanities	107
4.1.2 Digitisation of the information infrastructure in the humanities....	108
4.1.3 Digital sources for research in the humanities	109
4.2 Bibliographic information in digital form.....	117
4.3 Publications by humanities scholars in digital form	127
4.4 Digital tools supporting scholarly communication and research work ..	134
4.5 The digital humanities.....	138
4.6 The information infrastructure of library and information science....	153
4.6.1 Size of resources	153
4.6.2 WorldCat	156
4.6.3 Specialist journals	159
4.6.4 Open resources and repositories	161
4.6.5 Information resources for sample research areas in library and information science	163
4.6.6 Retrievability.....	170
4.6.8 Conclusions.....	174
4.7 Humanities scholars’ knowledge and skills in information-related activity.....	175
4.7.1 Information behaviours of humanities researchers	175
4.7.1.1 Research inspirations.....	195
4.7.1.2 Advantages and disadvantages of the electronic information space, as perceived by humanities scholars ..	199
4.7.1.3 Serendipity.....	201
4.7.1.4 Conclusions	202
4.8 The information competences of humanities scholars	204
4.8.1 Status of research	204
4.8.2 The information competences of humanities scholars in the studied PIS	211
4.8.3 Information awareness – the present state	221
4.8.3.1 Evaluation of features of information resources	223
4.8.3.2 Information-related activity.....	226
4.8.3.3 Attitude to digital publications	229
4.8.3.4 Approach to the publishing process	230
4.8.3.5 Assessment of own information-related activity.....	230

4.8.3.6 Attitudes to informal communication, ResearchGate and Open Access	232
4.8.3.7 The dominant model of information awareness	233
Conclusion	239
1. Basic assumptions of the explanatory model	241
2. Impact of digitisation on the PIS	242
2.1. Information frustration.....	244
2.2. Differentiation of groups of information users	246
2.3. Growth in the role of social media in scholarly communication...	247
3. Generational change.....	248
4. National science policy	249
5. Science policy at local level.....	251
6. The development of the digital humanities.....	252
Conclusions.....	252
The future.....	254
Bibliography	259
Appendices	273
1. Survey questionnaires	273
1.1 Questionnaire 1	273
1.2 Questionnaire on sources of information about tools (Survey 2) ...	279
1.3 Questionnaire on needs to improve information-related skills (Survey 3).....	280
1.4 Supplementary questionnaire on selected aspects of information awareness (Survey 4).....	281
2. Detailed results of bibliometric analysis	285
